

KAUSHAL SHAH Experience: 7+Years

Mobile Application Developer | Kotlin | Flutter | Java

Phone: +91 9427280669 | Email: kshah8102@gmail.com | Location: Ahmedabad, IN 382481 | [Linkedin](#)

SUMMARY

Mobile App Developer with 7+ years of experience building and delivering high-performance Android and cross-platform mobile applications across healthcare, logistics, on-demand delivery, and enterprise domains. Strong expertise in Android development using Kotlin and Java, along with Flutter for scalable cross-platform solutions. Hands-on experience integrating REST APIs, managing application lifecycle from development to production, and optimizing performance, stability, and user experience. Known for translating product requirements into reliable mobile features, collaborating effectively with cross-functional teams, and delivering production-ready applications that maintain high client satisfaction and long-term maintainability.

SKILLS

Kotlin, Python, Django, Vue.js, MySQL, Java, Android SDK, Jetpack Components, MVVM Architecture, Clean Architecture, Unit Testing, Play Store Deployment, App Bundles / Signing, Crashlytics / Analytics, Postman, Firebase, Firestore, FCM, Sentry Monitoring, Git

WORK EXPERIENCE

Sr. Mobile Application Developer & Project Manager

Ahmedabad, India

[ICoderz Solutions Pvt. Ltd](#)

Aug 2023 to Dec 2025

A company focusing on enhancing project efficiency through Agile methodologies and high-quality mobile application development

- **Improved overall project delivery efficiency by ~40%** by introducing structured Agile ceremonies, sprint planning, and delivery tracking across multiple concurrent projects.
- **Reduced operational and delivery costs by ~30%** through process optimization, improved resource allocation, and elimination of redundant workflows.
- **Ensured ~90% of projects were delivered on schedule**, proactively managing risks, scope changes, and dependencies without compromising build quality or team standards.
- **Led end-to-end delivery of multiple concurrent mobile and healthcare projects**, balancing scope, timelines, and resources to meet evolving business priorities while maintaining high build quality.
- **Planned project roadmaps, team allocation, and delivery milestones**, aligning engineering efforts with client objectives and organizational goals across Agile and hybrid workflows.
- **Owned delivery governance**, tracking progress against sprint goals, proactively resolving risks, and re-prioritizing resources to ensure on-time releases without compromising stability or quality standards.
- **Implemented Agile and Scrum practices** (sprint planning, stand-ups, retrospectives), improving team velocity, delivery predictability, and cross-team collaboration while reducing operational overhead.
- **Acted as the primary client-facing lead**, translating business requirements into actionable technical tasks, managing expectations, and resolving escalations to drive long-term client trust and satisfaction.
- **Collaborated closely with developers, QA, and stakeholders**, enabling smooth handoffs, clear documentation, and consistent delivery across multiple projects and timelines.
- **Drove continuous process improvements**, standardizing workflows and communication practices that increased overall project efficiency and reduced rework.

Android Developer

Ahmedabad, India

[ICoderz Solutions Pvt. Ltd](#)

Feb 2021 to Aug 2023

A company specializing in mobile application development and client project management

- **Delivered 15+ production-ready Android applications**, maintaining a **~98% client satisfaction rate** by aligning technical execution with client requirements and UX expectations.
- **Designed, developed, and delivered native Android applications** using **Java/Kotlin and Android SDK**, building production-ready apps tailored to diverse client requirements.
- **Architected applications using MVVM architecture**, improving code modularity, testability, and long-term maintainability across multiple projects.
- **Integrated third-party REST APIs and SDKs** (payments, maps, analytics, notifications) to extend application functionality and enhance

end-user experience.

- **Implemented push notification systems** using Firebase Cloud Messaging (FCM), increasing user engagement and improving real-time communication within applications.
- **Utilized Git-based version control workflows**, managing feature branches, code reviews, and releases to ensure stable and traceable deployments.
- **Collaborated cross-functionally with designers, QA engineers, and backend teams**, translating UI/UX wireframes into responsive, pixel-perfect Android interfaces aligned with product requirements.
- **Analyzed crash reports and performance metrics** using crash analytics tools, proactively resolving stability issues and significantly reducing application crash rates.
- **Incorporated client and stakeholder feedback** into iterative releases, ensuring applications evolved based on real user needs and business goals.
- **Contributed to multiple parallel projects**, coordinating with teams across departments while maintaining delivery quality and development timelines.

Jr. Android Developer

Fusion Informatics Ltd

Ahmedabad, India
Dec 2018 to Feb 2021

A company offering innovative software solutions and app development services

- **Developed and maintained native Android applications** using **Java/Kotlin and Android SDK**, contributing to client-facing products across multiple domains.
- **Supported the full Android application lifecycle**, including requirement analysis, feature implementation, testing, deployment, and post-launch maintenance.
- **Collaborated with senior developers, designers, and QA teams**, incorporating client feedback and business requirements into functional mobile solutions.
- **Executed functional and regression testing**, identifying and resolving defects prior to release to improve application stability and user experience.
- **Assisted in debugging and performance optimization**, gaining hands-on experience in resolving real-world production issues.
- **Adapted quickly to project requirements and coding standards**, building a strong foundation in mobile architecture, version control, and team-based development workflows.

Jr. Process Associate

K2 Data Search

Ahmedabad, India
April 2018 to Oct 2018

- Conducted **lead generation and data research activities** to identify potential clients and business opportunities across multiple industries.
- Collected, verified, and maintained **accurate contact information** including company details, decision-maker profiles, and outreach data.
- Followed defined **research processes and quality guidelines** to ensure data accuracy, relevance, and consistency.
- Coordinated with internal teams to understand **lead qualification criteria** and align data output with business objectives.
- Performed **data validation and cleanup** to remove duplicates and outdated information, improving overall lead quality.
- Met daily and weekly **productivity and quality targets** while maintaining attention to detail and compliance with process standards.
- Supported ongoing improvement of lead generation workflows through **feedback, documentation, and process adherence**.

PROJECTS

Hospital Management System

Role: Project Manager

Tech Stack: React.js, Tailwind CSS, MUI

- Led end-to-end project management for a **hospital management platform** covering patient registration, appointments, billing, and administrative workflows.
- Defined project scope, delivery roadmap, and sprint plans while coordinating between frontend, backend, and QA teams.
- Ensured timely delivery through **Agile execution**, backlog prioritization, and continuous stakeholder communication.
- Focused on usability, data accuracy, and scalable workflows to support healthcare operational needs.

Taxi Booking Application

Role: Flutter Developer & Project Manager

Tech Stack: Flutter, React.js, Tailwind CSS

- Led end-to-end project management for an **on-demand taxi booking application** connecting riders, drivers, and administrators through a single platform.
- Defined project scope, delivery milestones, and feature roadmap covering **ride booking, driver assignment, trip tracking, and payment workflows**.
- Planned and executed sprints using **Agile methodologies**, ensuring clear backlog prioritization, timely releases, and predictable delivery cycles.

- Coordinated cross-functional teams including mobile developers, backend engineers, QA, and UI/UX designers to ensure smooth execution across all modules.
- Acted as the primary point of contact for stakeholders, translating business requirements into actionable technical tasks and managing scope changes.
- Monitored project progress, risks, and dependencies, proactively resolving issues to maintain delivery timelines and application quality.
- Ensured high usability, reliability, and scalability of the platform to support real-time bookings and driver availability.

Fuel Delivery Application

Role: Flutter Developer & Project Manager

Tech Stack: Flutter, Laravel, Vue.js

- Managed delivery of an **on-demand fuel delivery mobile application** connecting customers, drivers, and service operators.
- Oversaw sprint planning, task allocation, and release management to ensure smooth feature rollouts.
- Coordinated with cross-functional teams to align business requirements with mobile application execution.
- Maintained delivery timelines while ensuring app stability and user experience quality.

Chowman - Chinese Food Ordering App (Kolkata, India)

Role: Flutter Developer / Project Coordinator

Tech Stack: Flutter, Laravel, Vue.js

- Contributed to development and delivery of a **restaurant food ordering application** for a high-volume Chinese food brand.
- Built customer-facing mobile features using **Flutter**, integrating backend APIs developed in **Laravel**.
- Collaborated with product, design, and backend teams to implement ordering, cart, and checkout workflows.
- Supported project coordination activities to ensure timely delivery and client satisfaction.

On-Demand Food Delivery Application

Role: Flutter Developer

Tech Stack: Flutter, Laravel, Vue.js

- Developed a **multi-vendor food delivery platform** similar to Zomato and Swiggy, supporting restaurants, customers, and delivery partners.
- Implemented core mobile features including restaurant listings, order placement, real-time order status, and notifications.
- Integrated REST APIs and ensured smooth communication between Flutter frontend and Laravel backend.
- Worked closely with designers and QA teams to deliver stable, user-friendly mobile experiences.

Baghdadi Sooq - Multi-Service E-Commerce Platform

Role: Flutter Developer

Tech Stack: Android(Kotlin), Laravel, Vue.js

- Built and maintained a **multi-module e-commerce and service platform** supporting food orders, grocery shopping, global store orders, and taxi booking.
- Developed cross-platform mobile features using **Flutter** and native Android components using **Kotlin** where required.
- Contributed to feature optimization, stability improvements, and scalable mobile architecture.

EDUCATION

Bachelor of Engineering

Grow More Group of Institution - Himatnagar

Aug 2013 to July 2017

LANGUAGES

English, Hindi, Gujarat
